

AUGE® History

AUGE – Automação e Geradores, lda.®, was founded by April 5th, 1993 in the 12th Notarial office in Lisbon, published in the Journal “Diário da República” N. 238/97 Series III 14/10/97 starting immediately its activities.

Our main office was in Rua da Alvorada Lote 9, Via Rara - Santa Iria de Azóia, this was also to address of their business from the foundation until December 1999.

In January 2000 the company began to develop the business at Rua Pedro Soares, Lote 42, Via Rara - Santa Iria de Azóia in a building built especially for this purpose.

From April 3rd, 2006 we transfer our company to an main office to larger premises in Polígono Industrial Granja, Estrada Nacional 115/5, Lote 7 – B.4, in Vialonga.

The company is divided in equal shares by the founding partners José Manuel Alves Venido and João José Marquito Arez Briosio.

Strategy

Our goals have been achieved with the determination and dedication of our collaborators, as such, AUGE has obtained through the time to conquer the satisfaction of its customers that's reflected by the gradual increase of the results volume.

Currently with the unfavorable economic conjecture, AUGE can be proud to have a volume of orders that guarantees work continuity.

In contracycle with the international conjuncture, AUGE, continues to increase the expertise technicians department.

At the current moment we develop efforts in the search of new markets, nominated in the portuguese language countries of África and South America.

The new technologies in the area of the energies, are a priority of the company for the next decade, being in development in our project office and electronic laboratory, highly innovative systems in the energy generation.

Our Partners

When AUGE started its activity, approximately 16 years ago, we set out our strategy with the main objective to provide quality to the customers for alternative energy solutions, and continuously emergency power.

In order to achieve the objective, AUGE proposed to work exclusively with conceptualized brands.

AUGE began his business to work in partnership with STET - Division of Energy Systems Caterpillar and with SIEMENS - UPS Systems and Automation.

At the same time we are given the distribution of DEEP SEA products, English brand of one of the worldwide largest manufacturers in systems designed for the power control.

In October 1998, a contract was signed with SELCO (Denmark) to represent its products in Portugal. The SELCO components are of excellent quality, and started to equip our electrical switch boards with emphasis for the implementation of the parallel between generators.

In 2008, Siemens set AUGE the responsibility for the repair of the Micromaster drives and Sinvert Solars, and created the Department SOS DRIVES.

Representations

AUGE is an exclusive distributor of SELCO, No. 1 in the control systems of generators and exclusive representatives for the African countries of Portuguese official language of VISA, Italian brand of generators.

AUGE also distributes all equipments of Deep Sea.
